Steps to configure Cassandra:

1. Cassandra keyspace creation:
    a. create KEYSPACE sales_ks WITH replication = {'class': 'SimpleStrategy', 'replication_factor' : 1};
2. To select a particular db from a list of databases:
    a. use sales_ks;
3. Table creation in the cassandra:
    a. CREATE TABLE sales_ks.orders_tbl (order_id int PRIMARY KEY, created_at text, discount text, product_id text, quantity text, subtotal text, tax text, total text, customer_id int, timestamp text);
    b. describe tables;
    c. select * from orders_tbl;
